Husky Coil Sheen

Bio-degradable, non-flammable, cleans and brightens, removes white rust, and digests soils deposits.

DESCRIPTION: **Husky Coil Sheen;** use a mineral based acid cleaning system to penetrate and breakdown oxidation, white rust and alkaline salts in coastal applications. Product removes corrosion and oxides on aluminum and copper metal surfaces. This includes condenser and evaporator coils, copper tubing inside a unit as well as the external cabinet components of most HVAC/R systems. This acidic mineral acid is strong enough to remove corrosion and oxidation, but mild enough for roof membranes and technician safety. Regular use of Husky Coil Sheen aids in maintaining the operating efficiency of air conditioning, refrigeration and ventilation systems in alkaline environments including beach front and salt spray locations. Husky Coil Sheen neutralizes alkaline based salts, and helps them to be carried away from metal surfaces and the root cause of corrosion. Husky Coil Sheen is a recommended cleaner for coils coated with Bronz-Glow's Husky Coil Coat, Green Fin Coil Protector, Sea Coast and even Petro-Coat when equipment is installed in coastal salt laden environments. Husky Coil Sheen is safe to use on coated and un-coated coils. Husky Coil Sheen removes and breaks down corrosion deposits.

CLEANING RECOMMENDATIONS: This cleaner should be used as directed and as outlined in Bronz-Glow's; "Owners Coil Cleaning & Maintenance Manual". You can apply this product using a pump up pesticide sprayer, or a dial spray canister at the end of a garden hose. This cleaning product does not hurt surrounding building materials or plant growth. The mix ratio of this product is 22:1. 22 Parts Water to 1 Part Husky Coil Guard. You are purchasing a cleaning product when you buy Bronz-Glow's Husky Brand Coil Cleaners, not water. See each bottle of Husky Coil Sheen for directions on how to use this unique product.

BENEFITS:

- Compatible with Bronz-Glow's coating products.
- Neutralizes salt, and removes it from the surface.
- Non-Toxic Cleaning Solution.
- Excellent for coated or un-coated coils / Condensers or Evaporators
- No noxious fumes, and does not burn the skin.
- Technician Safe and easy to use.
- 22:1 mix ratio means more product per dollar spent.

PRODUCT COLOR: Light Pink

Packaging: Case = 4 x 1 gallon poly bottles, 55 gallon drums, and 5 gallon pails upon request.
